Preparing for a new decade to complete half a century of history

Since its establishment in 1980 with the founding philosophy of 'National Development, Creative Culture and Social Service,' Daejeon University has become a representative private school in the central region of Korea. Despite difficult situations at home and abroad, all members of DJU have made various efforts to practice the founding philosophy and realize the Hye-hwa value system.

In recent years, we have been directing our strength in preparing for the forthcoming Fourth Industrial Revolution by establishing a strong industry-academia cooperation system that connects studies to practical applications and implementing continuous educational innovation under the slogan of 'Solid Foundation & Special Experiences'. As a result, DJU was selected for the Advancement for College Education Program and was subsequently named as an 'Autonomous Improvement University,' which is the highest rating in the University Basic Competency Diagnosis.

We are expanding various educational activities so that students can further enhance their self-directed academic competencies. For example, DJU is practicing the innovation of learning support system to foster creative talents with core competence required in the future society by implementing teaching and learning based on 7 core competencies, training teaching and learning methods to professors and students, mentoring, student counseling by professors and experts, and employment support programs by stage, module, and level.

DJU is also enhancing the industry-academia cooperation system that links education with industrial sites. For example, we are supporting local communities and implementing industry-academia convergence educational programs such as Nano degree, capstone design, short and long-term field training, internship, start-up activity support, 3-way living lab, and corporate technology development support.

In addition, Hye-hwa Residential College, a living and after-school learning community that opened in March 2018, is operating whole-person education programs such as community education, reading, discussion, language, drone, startup, music, art, DIY, and sports with a new educational aim that is suitable for the Fourth Industrial Revolution Era characterized by hyper-connectivity, superintelligence, and superfusion.

Looking back at the past 40 years, we now make a new resolution with the aim of presenting a new standard of future university. As the reality of education changes rapidly, DJU will strive to be faithful to the fundamentals of education. We believe that the mission of universities in the era of the Fourth Industrial Revolution is to train true human beings with virtue and wisdom besides teaching students specialized knowledge in their major field of study. DJU will support its students, making sure that they accumulate special experiences in industry-academia cooperation, RC programs and international exchanges on top of solid foundation of knowledge and advance into society as talented people required by a new society.

We will take steps into a new decade to complete the half-century history of DJU by listening to the voices of all DJU members and solving conflicts and problems with cooperation and wisdom.

Thank you.

Lee Jong-seo, President of Daejeon University

The best private university in the central region of Korea
 The cradle of education tailored for students and creative future

DJU leading education innovation

Since its acquisition of university institutional accreditation in 2012, DJU has been selected in major government funded projects such as LINC, ACE, and the University for Creative Korea (CK-1), a project for promoting specialization of regional universities.

In 2017, DJU was selected for the community-tailored LINC+ project and was designated as an E-Procurement Support Center and a Testing and Inspection Agency of the Ministry of Food and Drug Safety. In addition, DJU is actively implementing various government funded projects for student education, research, and industry-academia cooperation.

2018

- Selected for the System Industry Hub Organization Support Project by the Ministry of Trade, Industry and Energy (Smart Healthcare VR-based)
- Selected for the Demand Responsive Water Supply Service Project by the Ministry of Land, Infrastructure and Transport
- Selected for the University-Centered Research Institute Support Project by the Ministry of Education
- Selected as Autonomous Improvement University according to University Basic Capacity Assessment by the Ministry of Education
- Selected for pilot operation of University Innovation Support Project
- Re-selected as host university of undergraduate scholarship holders in the GKS program
- Selected as Youth Counseling Welfare Center
- Selected for the Innopolis Campus Promotion Project

2020

- Selected for the 4th Industrial Revolution Leading University Project
- Selected as the best (upper ranking) institution in the 2019 annual evaluation for the community-tailored LINC+ Promotion Project
- Selected as the best university in the 1st year (2019) evaluation for University Innovation Support Project by the Ministry of Education
- Cheonan Korean Medicine Hospital of DJU selected for Sleep Industry Evidence-based Technology Advancement Support Project

2019

- Selected as a university entering the second phase of community-tailored LINC+ Promotion Project
- Selected for the Humanities and Social Sciences Research Institute Support Project by the Ministry of Education
- Selected for Type 1 of the University Innovation Support Project (Voluntary Agreement)

Flight toward the world
Challenge to the future

Let's Go! Into the world!!

The various programs provided by the Institute of International Affairs not only allow enrolled students to improve their language skills on campus but also help them grow and become global talents who understand the culture of other countries through natural exchanges with foreign students.

Foreign Language courses on campus

The IIA offers various after-school courses for TOEIC, TOEFL, TOEIC Speaking, New HSK, and JPT with full scholarships.

Intensive Foreign Language Course Program

Courses for TOEIC, TOEFL, TOEIC Speaking, New HSK, JPT, etc. are offered with full scholarships during school breaks.

토익 캠프 운영

방학 중 토익, 토플, 토익스피킹, 신HSK, JPT 등을 운영하며, 전액 장학금으로 운영된다.

Practice the TOEIC test(4 times per semester)

Students can experience TOEIC in an inexpensive and convenient way on campus and gain confidence in taking TOEIC.

Global Lounge

The Global Lounge is a place where students can casually meet and interact with international students. It is equipped with a large screen, TV, and audio equipment and facilitates the Talking Club, a free-discussion session in foreign languages with international students from various countries.

Buddy program

Students participating in the Buddy program can interact with international students and help them with school life. It is a great opportunity for them to naturally come into contact with foreign cultures and improve foreign language skills.

To foster global leaders

Operating various programs

Daejeon University has formed sisterhood relationships with 100 educational institutions in 25 countries, including the United States, the United Kingdom, Canada, Russia, Japan, China and 10 ASEAN countries, and is taking the lead in strengthening the global competencies of students through active international exchanges.

Global Korea Government Scholarship Invitation Program

Daejeon University has been selected as an implementing agency of Global Korea Scholarship, which is a scholarship program operated by the Korean government for international students. Hence, DJU is attracting and educating excellent students from all over the world through this program.

Exchange Student Program

DJU offers students the opportunity to study at sister universities in various countries for a semester or one year. Tuition is supported by the university as a scholarship, and the credits earned at sister universities are recognized as credits earned at DJU.

Global Insight, Short-term Study Abroad Program 10 Universities in 10 countries 100 students per semester

This program allows DJU students to go to overseas universities for language training and cultural experiences with the university covering 50% of the training fee. The program is implemented twice a year, and 4 credits from the seasonal semester can be recognized per semester.

• **Countries** : Japan / China / USA / UK / Canada / Australia / Russia / Malaysia / Indonesia / Thailand

Attaché

Attaché are matched with international students by language to provide help. They also attend various events hosted by Institute of International Affairs and improve the internationalization capacity of themselves and the university.

Overseas sister university invitation program

Students from sister universities in other countries are invited to DJU during school breaks to learn Korean language and experience Korean culture.

Current status of international students

As for international students at DJU, there are currently 200 undergraduate students, 31 exchange students, 240 Korean language education center students, 18 graduate students, and 33 doctorate students.

Hope becomes the way.

Hope gives us direction
and makes us run hard.
It is a great indicator of life.

DJU supports your dream

DAEJEON UNIVERSITY

Challenge for a new dream

Academic program offering various tracks of study

DJU is actively responding to changes in educational demand and environment by offering courses in teaching and those leading to double major and minor. The flexible transfer system unique to DJU opens doors to a variety of academic tract or concentration.

Academic Program

Teaching training courses

When students meeting the graduation requirements stipulated by the school regulations are selected as those who have completed teaching training courses at respective division or department (major), approved for the establishment of teaching training courses by the Ministry of Education, and have met the prescribed courses and qualification requirements, they are granted a teacher certificate-secondary school teacher certificate (Grade II), special education school teacher certificate (Grade II), professional school counselor certificate (Grade II), nutrition teacher certificate (Grade II), school health teacher certificate (Grade II)-upon graduation. Currently, teaching training courses are offered in 6 regular bachelor degree programs and in one teachers college program.

Double major

Students may major in two or more fields of study/departments while attending DJU. In order meet the requirements, a student must complete 36 credits in the primary major and 36 credits in the second major. Both majors that have been completed are designated on a single diploma which is awarded to the student upon graduation. Students may apply for double major starting from the end of the first year, although the application is taken only at a set period of time in each semester. (However, Dept. of Architecture and departments related to training medical personnel are excluded from this program.)

Minor

Students may acquire a minor by completing 21 credits in that field of study/department in addition to their majors. Upon graduation, the minor field of study is designated along with the major on the diploma (graduation certificate). Students may apply for double major starting from the end of the first year, although the application is taken only at a set period of time in each semester. (However, Dept. of Architecture and departments related to training medical personnel are excluded from this program.)

Transfer system

The transfer system allows students to change their affiliation from the department (major) selected at the time of admission to another department (major). Those who have completed two or more semesters as full-time students and have completed required credits for each school year (semester) may transfer once during their enrollment. Students admitted to Military Studies, Pre-med Studies of Korean Medicine, and Nursing departments are not eligible for transfer. In relation, Dept. of Biomedical Laboratory Science, Dept. of Emergency Medical Technology, and Dept. of Physical Therapy must not accept students beyond the admission quota. Students who have entered DJU as transfer students or through special admission are not eligible for transfer.

Shedding light on the future with the value of learning

A University where everyone's dream becomes a reality DJU supports your hope.

Various scholarship programs are implemented to cheer for a hopeful tomorrow.

DJU provides scholarships in all directions so that excellent and sincere students can keep their spirits up and continue to study hard.

On-campus scholarships have increased steadily from 2012 to 2019 and are covering more than 20% of the tuition income.

DJU is always working hard to ensure that many students receive scholarships by establishing new scholarships for students in the blind spots of scholarship system.

Scholarships

On-campus scholarship

Academic Excellence Scholarship, Academic Encouragement Scholarship, Self-recommendation Scholarship, Labor Scholarship, Hope Challenge Scholarship, TOEIC Camp Scholarship, Mileage Scholarship, Volunteer Scholarship, etc.

Off-campus scholarship

Jisan Scholarship, Jeongsu Scholarship, Gyeryong Scholarship, Korea Scholarship Foundation for the Future Leaders, Korea Student Aid Foundation (National Type I, Type II, etc.), Veterans Scholarship, Volunteer Fire Fighter Children's Scholarship

The entertaining & interesting of college life!
Creating my individuality

The highlights of college life! Student Clubs

DJU enthusiastically supports various club activities for healthy social exchanges and cultural life of students. Currently, there are 38 active clubs in five categories including liberal arts, culture, service, religion, and sports.

The clubs in the liberal arts category are DSLR(photography), Daban Hyangcho(tea ceremony), Daehwanjang(design), Modoo Marble(board game), Murirang(comrades), Saeul Literary Society(reading), Sodam(discussion), Screen(movie), etc. In the culture category, there are active clubs such as 3K(hip-hop), Radical(acoustic guitar), Cosmos(band), Pegasus 2(theater), Forte(acoustic guitar), and Pinocchio(dance). Volunteer clubs include KFF, RCY, Y-SMU, Good Neighbors, Rotaract, Yeourina, and Hanul Society, while religion clubs include Christian CCC, DFC, JDM, Navigator & Jeungsando, and Buddhist Youth Association. As for sports clubs, there are TNT(badminton), Geumgang(Taekwondo), Gear(bicycle), Daegeom Society(Kendo), Dragon(Soccer), Renaissance Takwoohoe(table tennis), Mister Mister(basketball), Superstar(basketball), Yasamo(baseball), Approach(Tennis), Perfect(bowling), etc.

Artists on a splendid outing
A stage of rich sensibility and romance

Thursday Culture Concert

DJU operates Thursday Culture Concert to promote students' cultural sensitivity and creative thinking.

Starting with Lee Doo-sung's pantomime performance presented in September 2005, a total of 160 culture & art performances were presented until 2019.

Artists from various fields took the stage such as Lee Moon-sae, Kang San-e, Kwon Jin-won, Nah Youn-sun, etc.

DJU students enjoy rich sensibility and romantic leisure through the performances presented on Thursday Culture Concert.

The new standard of future universities!

Daejeon University, the best university in the central region,
is setting a new vision for a great future.

DAEJEON UNIVERSITY

Life-respecting, patient-centered,
convergence prestigious Korean medicine

Daejeon University Hyeohwa Medical Center

Differentiated medical services that practice comfort and love for life
21st century hyper-specialization hospital specializing in obstinate diseases
Advanced general hospital with a balance of treatment, education, and research

Daejeon Korean Medicine Hospital of DJU

Daejeon Korean Medicine Hospital was established in 1982 to carry on the tradition of Korean medicine based on Hyeohwadang Korean Medicine Clinic. In 2004, DJU opened Dunsan Korean Medicine Hospital with the aim of improving accessibility and establishing a comfortable Korean medical environment for local residents. With the addition of a new building and the integration of Dunsan Hospital in 2018, the entire scale Daejeon Korean Medicine Hospital was expanded to 10 centers and 149 beds. In March 2020, the brand name was changed to 'Korean Medicine Hospital of Daejeon University' in order to inherit the 40-year history of Korean Medicine Hospital of DJU. Including East-West Cancer Center, which is the first Korean medicine cancer center affiliated to a university hospital in Korea, Pain & Spine Center, and Brain Center, the ten specialized centers are equipped with medical treatment systems to improve the quality of life through the prevention and treatment of diseases. Researchers and doctors are conducting studies for the modernization and scientification of Korean medicine and are continuously producing meaningful results. Daejeon Korean Medicine Hospital is also leading the future Korean medicine by fulfilling its role as a university hospital through clinical practice and education provided to students so as to foster Korean medicine doctors.

Cheonan Korean Medicine Hospital of DJU

Cheonan Korean Medicine Hospital was opened in Dujong-dong, Cheonan City in 1991 to play a responsible role for health management of local residents and improvement of public health through Korean medicine. With the goal of becoming a 'Healthy and Influential Hospital,' Cheonan Korean Medicine Hospital provides differentiated medical services to the central region of Korea, including Cheonan City, southern part of Gyeonggi-do province, and Chungcheong region. Medical staff specialized in brain diseases and traffic accident-related injuries provide systematic treatment according to a patient's condition. Cheonan Korean Medicine Hospital implemented a 'water' treatment program related to hot springs, the first of its kind in Korea conducted as a regional specialized project connected to the local community, and the Sleep Industry Evidence-based Technology Advancement project. Thus, Cheonan Korean Medicine Hospital is taking the lead in continuous research and development and is devoted to the popularization of Korean medicine.

공통내용

Special discount on herbal medicine charge is provided to DJU current students, graduates, students on leave of absence and their immediate family members.

Seoul Korean Medicine Hospital of DJU

Seoul Korean Medicine Hospital of DJU was opened in September 2019 with the goal of expanding the scope of Daejeon University and establishing itself as the flagship hospital of Hyeohwa Medical Center. It plans to build a 'patient-centered and future-oriented innovative hospital' that realizes a Korean integrated medical care focusing on "innovation, globalization, challenge, and creation." To this end, the hospital provides differentiated treatment services based on East-West Cancer Center, Integrated Immunology Center, Spine & Nerve Rehabilitation Center, and Women's Medical Center. In addition, based on DJU research infrastructure, Seoul Korean Medicine Hospital operates future-oriented innovative programs such as precision medicine-based genetic testing and immune cell therapy program and global health care program. Seoul Korean Medicine Hospital, housed in a 16-story building with 3 floors below the ground and 13 floors above the ground, is equipped with 50 beds and all necessary facilities for patient care such as high frequency heat treatment room, immunization injection room, decompression treatment room, moxibustion room, fumigation therapy room, foot & half body bath, and yoga meditation room. The hospital also has clinical pathology room, a radiology room, and a physical therapy room to provide the best medical service in a pleasant environment. Designed by Seung Hyo-sang, one of the best architects in Korea, the hospital building is equipped with high-quality convenience facilities such as a library and indoor garden, and thus provides satisfactory services not only to patients, but also to guardians and visitors.

Cheongju Korean Medicine Hospital of DJU

Cheongju Korean Medicine Hospital was opened in Yongdam-dong, Sangdang-gu, Cheongju City in 1992 to improve the quality of health of local residents in Chungcheongbuk-do region. Located in an environment with the good scenery of Uamsan Mountain, the hospital is used for treatment and healing of Cheongju residents. The medical staff at the hospital is delivering reliable treatment with accurate diagnosis through close examination of cause of disease and constitutional classification and is expanding the scope of patient treatment by operating various Western and oriental testing equipment. The hospital is continuously improving the medical services through the introduction of medical equipment and quality improvement of physical therapy and manual therapy. Cheongju Korean Medicine Hospital is continuously gaining trust and prestige in the local community through medical services and events, close cooperation with local medical institutions and friendly activities with local residents. The medical staff at Cheongju Korean Medicine Hospital are contributing to the creation of a healthy community.

DJU, more beautiful than flowers

Every part of the campus landscape becomes a scene in a movie!

Every corner of DJU campus feels like a movie scene, for the campus is filled with works by representative Korean architects such as Min Hyeon-sik, Seung Hyo-sang, Cho Min-seok, etc. For example, the 30th Anniversary Memorial Hall, Hyehwa Culture Center, and HRC (Heart Hall) are the works of Seung Hyo-sang and highlight views of people and nature in harmony. In addition, the UDIP (University of Daejeon Innovation Park) designed by Min Hyeon-sik, DCS (Daejeon University Convergence Space) designed by Lee Min-ah, a recipient of Kim Su-geun Architecture Award, and HRC (Harmony Hall) designed by Cho Min-seok feature profound harmony with nature, breaking away from uniform appearances of existing architecture. Such architectural and landscaping beauty of DJU campus has been introduced in various feature films and TV dramas, contributing to wide publicity of the university.

Hyehwa Liberal Arts College(H-LAC)

In order to cultivate talents required in the future, H-LAC educates students so that they build proper character and values and become consilience-oriented (communicative, cooperative, and creative) talents with humanities literacy.

H-LAC has made dual major mandatory for students in order to foster their comprehensive intelligence and convergent thinking. It will lead Korean college education in the future by realizing the educational vision of 'Broader Freedom, Deeper Thinking, and Higher Intelligence'.

- Global Culture Contents
- Korean Language, Literature & Creative Writing
- History & Culture
- Economics
- Biological Science

College of Design & Arts

The College of Design and Arts is a large community in which flexible fusion takes place between various disciplines such as architecture design, fashion design, visual communication design, animation and motion graphics, broadcasting and performing arts with the aim of maximizing realized art.

In order to provide better value in the living environment of humans, the College of Design and Art is making every effort to produce leaders of intelligent space creation who will realize that.

- Dept. of Architecture(5-year program)
- Dept. of Fashion Design & Business
- Faculty of Design & Animation | Dept. of Visual Communication Design | Dept. of Animation & Motion Graphics
- Department of fusion in performing arts

College of Social Sciences

Social science is a discipline that cultivates the ability to analyze, research, and solve problems occurring throughout society through scientific approaches.

The College of Social Sciences teaches students to grow into talented individuals with upright character, high level of knowledge, sense of responsibility, and judgment, while emphasizing the important functions of research and social service.

- Faculty of Military & Police Studies | Dept. of Military Studies | Dept. of Police Science
- Dept. of Law
- Dept. of Public Administration
- Dept. of Social Welfare
- Dept. of Child Education & Counseling
- Dept. of Secondary Special Education

College of Business Administration

The College of Business Administration started to operate in 1981 with the opening of Daejeon University. Since then, it has created various fields of study that reflect the global era and the age of interdisciplinary and multidisciplinary studies.

The College of Business Administration is striving to foster talented people for the future society by building excellent faculty members with the goal of 'Driving creative economy' and 'Contributing to local communities.' The faculty and staff are especially making an effort to foster global talents who meet the domestic and foreign industrial demands according to the changing needs of times and to enhance their job competitiveness.

- Faculty of Business Administration | Dept. of Business Administration | Dept. of Medical Management | Dept. of Accounting
- Faculty of Global Business | Dept. of Global Languages
- British-American Languages & Cultures
- Chinese Language & Culture
- Japanese Language & Culture | Dept. of International Commerce
- | Dept. of Logistics & Physical Distribution | Dept. of Industrial & Advertising Psychology

College of Engineering

The College of Engineering aims to produce talents with convergent capabilities suitable for a creative era by building an excellent faculty in both research and industry-academia cooperation by major field of study.

Based on capstone design course conducted by students and supervisors, the College of Engineering is fully supporting the students so that their creative ideas can be applied to companies.

보건의료과학대학

Specialized for the education of cutting-edge health and medical science that pursues the health and happiness of humankind, the College of Health & Medical Science consists of 8 departments. It offers master's and doctoral programs to foster talents who will play a pivotal role in society and is equipped with an affiliated research institute for in-depth research.

Graduates are working in leading domestic and international institutions and at all levels of society. DJU and the faculty and staff of the College are gathering their capabilities to foster creative and life-respecting health care professionals.

- Dept. of Nursing • Dept. of Physical Therapy • Dept. of Biomedical Laboratory Science
- Dept. of Emergency Medical Technology • Dept. of Beauty & Health Care • Dept. of Food & Nutrition
- Faculty of Sports Science | Dept. of Sports for All | Dept. of Health & Exercise Management

College of Future Convergence

The College of Future Convergence is specialized for future technology education and convergence/multidisciplinary education in order to foster talents who will lead the Fourth Industrial Revolution Era.

Including the newly established Department of AI Convergence and Department of FinTech (Financial Technology), the College has innovative technology-based departments that will lead future industries, such as the Department of Big Data Science and the Department of Information Security. The College of Future Convergence also has the Division of Convergence & Multidisciplinary Studies consisting of various convergence and interdisciplinary programs that connects other departments and majors and the Division of Entrepreneurship, which can be opted as a double major or minor by students interested in business startup.

- Dept. of Artificial Intelligence & Convergence
- Dept. of Fintech
- Dept. of Big Data Science
- Dept. of Computer & Information Security

College of Korean Medicine

The College of Korean Medicine is striving to reorganize the curriculum and build a reliable educational infrastructure including cutting-edge facilities and equipment for the training of true medical personnel with character, ethics, and expertise in accordance with the founding philosophy of National Development, Creative Culture, and Social Service.

In order to become the best research and clinical institution in Korean medicine, the College of Korean Medicine is taking the lead in the scientification, standardization, and modernization of Korean medicine by securing excellent research personnel. Through continuous change and reform, the College of Korean Medicine is striving to promote national medical care and human welfare and to foster outstanding talents who will lead Korean medicine.

- Dept. of Pre-medical Course of Korean Medicine

Research with passion

Quest for the future

Great challenges to new knowledge

The cradle of nurturing core talents Graduate schools of DJU

The general graduate schools of DJU have regular master's and doctoral programs in various disciplines including Korean Medicine and is committed to fostering next-generation talents and strengthening industry-academia cooperation by actively participating in academia-research-industry cooperative courses and off-campus R&D research activities. Through RA scholarships, they offer many students to devote themselves to research and study.

The special graduate schools of DJU are reinforcing the capabilities of future core talents by providing educational services that meet the diverse educational needs of the local community.

General Graduate Schools

The general graduate schools of DJU are making qualitative and quantitative development by establishing and operating academia-research-industry cooperative programs under research personnel and technology exchange agreement with Korea Institute of Energy Research, Korea Electronics and Telecommunications Research Institute, Korea Institute of Oriental Medicine, and Korea Ginseng and Tobacco Research Institute. Furthermore, they are spreading their programs into the world, focusing on globalization through student and academic exchanges with universities in China, Russia, and other countries.

Special Graduate School

DJU is operating special graduate schools with the educational goal of "fostering creative leaders in the information society of the 21st century" in order to foster competent talents who will play a pivotal role in national development.

Graduate School of Business Administration & Social Welfare

Provides high-quality educational services to meet the diverse educational needs of local communities.

Graduate School of Counseling

Strives to foster professional counselors capable of preventing and solving psychological conflicts and problems of individuals, families, and groups occurring at home, communities, and organizations.

Graduate School of Education

Makes every effort to foster professional educators who will be responsible for future education by operating field-centered curriculum, academic programs centered on learning sites, and faculty dedicated to graduate schools and expanding opportunities for re-education.

Graduate School of Health & Medicine

Strives to foster future-oriented creative experts based on the tradition of respect for humans and makes the best effort to develop substantial contents to create the brand value unique to the Graduate School of Health & Medicine.
